About the Issue

IIOAB Journal (www.iioab.org) is publishing high quality articles in its Regular issues and various hot topics in its thematic Special Issues since 2010.

IIOABJ is currently inviting article for a special issue on **COVID 19** focusing on **Lessons from the past, the present scenario and into the Future of the COVID-19 pandemic**. Since the Spanish Flu in 1918, the world has not seen a devastating pandemic of such proportions. The COVID-19 pandemic has changed the world in unprecedented ways. The past does not repeat but it does rhyme. Studying the past is a way to try to predict the future but things can change unpredictably too. Hence is the need of today is to understand the implications of COVID-19 on the health of the global population by learning the lessons from the past experiences, applying them to the present and progressing with the knowledge towards an uncertain future.

Expected contributions call upon a wide range of manuscripts related to any aspect of the COVID-19 pandemic. This special issue welcomes papers from all the areas which are related to the proposed topic and the **article type can be case reports, review, meta-analysis, commentary etc.**

Subject Coverage

Suitable topics include, but are not limited to, the following: Models focusing Engineering and Technology development using

- Epidemiology of COVID-19
- Clinical aspects and Diagnosis
- Genomics of 2019-nCoV;
- Meta-analysis of studies related to COVID-19
- Current clinical trials in COVID-19
